

Women in GIS are in High Demand!

Mesa is a CalWomenTech site—that means female students in GIS can take advantage of many career resources such as:

- Checking out software and pubs that will boost your tech skills through the CalWomenTech Learning Library
- Searching for jobs on the WomenTech E-jobs site
- Reading inspiring role model stories
- Networking with other women in your field through the WomenTech Talk Yahoo Group
- Finding a mentor through our E-mentoring site

Geographic Information Systems (GIS) is one of the fastest growing disciplines around with careers in many different fields.

Register now for Mesa's GIS program in the Business, Computer Studies and Technology Department. After receiving your GIS A.S. degree in two years (full-time) you'll have the skills to be a GIS technician in the public or private sector. You can also complete a GIS certificate, which gives you the skills to be a GIS intern in less than one year! Whether you're interested in business, environmental assessment, or city and regional planning, this program is for you!
